Labreport, Gruppe 4

Projekt Netzwerk-Infrastruktur WS 2017/18

vorgelegt von

Dewin Bagci: 5bagci@informatik.uni-hamburg.de
Karan Popat: karan.popat@outlook.de
Hanife Demircioglu: h.demircioglu@hotmail.de

MIN-Fakultät

Fachbereich Informatik

Abgabedatum: 01.03.2018

Dozent: Robert Olotu

Inhaltsverzeichnis

1 Abkürzungsverzeichnis **4**

Abbildungsverzeichnis **5**

Part 3: Network Troubleshooting Utilities **6**

Exercise 6: Managing Services (Please use pnidX-svr-mu 7

Exercise 7: Configure the following network (figure 1) using ifconfig and route add 7

Exercise 8: Configure the following network (figure 1) using ip and nmcli . . 7

Exercise 9: Configure the following network (figure 1) using GUI 7

Part 4: Network Scanning **8**

Exercise 1: Configure the networks of figure 1 8

Exercise 2: NMAP 8

Exercise 3: Nessus network device identification 8

Exercise 4: OpenVAS Network device identification 8

Part 5: Sniffing, Virtual Private Network (VPN) **10**

Exercise 1: Configure and set the networks shown below (figure1 and 2) . . . 10

Exercise 2: Getting started with network monitoring tools 10

Exercise 3: TCPDUMP 10

Exercise 4: Wireshark 10

Exercise 5: Experimenting with network monitoring tools 10

Exercise 6: Set up a host-to-host VPN using preshared key 10

Exercise 7: Set up a host-to-host VPN using RSA keys 10

Exercise 8: Set up a network-to-network VPN using preshared key 10

Exercise 9: Set up a network-to-network VPN using RSA secrets keys 10
